

## Turn Your PC Into an Interactive Whiteboard

Add BigNote<sup>®</sup> 1.2 software to your PC, including an InFocus BigTouch<sup>™</sup>, and turn it into a powerful interactive whiteboard.

Take notes, sketch, annotate, and share your work with this powerful and easy-to-use app.

- Pens, highlighters, shapes and lines in multiple colors
- Whiteboard on a canvas that can be extended 10x in any direction
- Annotate over any application and save the changes
- Capture all or part of your screen, then draw on it, save it and send it
- Email files to meeting participants as JPG, PDF or BigNote's format
- Launch the BigNote feature you want to use with one click
- Files are interchangeable with InFocus Mondopad
- Run it on any Windows 7 or Windows 8 PC
- Free 30-day trial

Glass Mode lets you save the background as well as the annotation data

Auto-Shape Mode turns your drawing into well-formed lines and shapes

### System Requirements

Operating system	Windows 7 or 8
Processor	Intel i5 or above
RAM	4 GB
Hard drive space	18 MB

### BigNote whiteboarding makes work more imaginative and productive

BigNote is designed for touch—so you can take full advantage of all the interactive capabilities of an InFocus BigTouch or JTouch display. But BigNote is also compatible with Windows 7 and Windows 8 PCs.

### Simple, fun tools help your team brainstorm and capture info and ideas

Take command of the screen with a complete set of writing and drawing tools, pens, highlighters, shapes and lines. BigNote sparks conversation, stirs interest and lets you record and share information and ideas.

### On-screen notes and real-time collaboration keep ideas from escaping

Circle or highlight key info on PPT slides, spreadsheets, design comps, web pages and anything else on your screen with BigNote's "glass mode" for more effective communication.

### Share drawings and notes right from the screen

When you're ready, you can easily collect, save and email anything you create in BigNote right from your display.

### Cross-platform compatibility lets you switch devices easily

BigNote and Mondopad share a similar feature set and interface, so whiteboard files created on one platform can also work on the other.
